Dollars Apart

Hong Kong's gender pay gap twice Singapore's

Note: Hong Kong, Singapore and U.K.'s data for 2016; the others for 2015
Data: Government data; graphic by Bloomberg Businessweek

A recent report from Hong Kong's government shows the pay gap between male and female employees tops Singapore's by more than 10 percentage points. And while the difference between what men and woman make has narrowed in places like the U.K., Hong Kong's gap widened to 22.2 percent from 19.1 percent a decade ago.
